

The Daily Telegraph

Prefab and groovy

The aesthetics of Ecospace's garden studios are truly eye-catching; a cross between a sauna and a luxury apartment (right). Choose between modular structures or a bespoke design. The heated and insulated buildings have a suspended timber floor and can be erected in three days, ready for immediate use. You can even include a vast window/door to maximise the view of the garden.

A typical module measures 3.6m by 3m (12ft by 10ft) and is 2.8m (9ft) tall. It costs about £15,000 plus VAT.

Ecospace (020 7703 4004; www.ecospacestudios.com).
